

Accessibility Statement

This is a tagged PDF. Every block below carries a semantic role — headings, paragraphs and figures — so a screen reader can announce the structure and navigate it in logical reading order. Turn on `options.tagged` in any template to get this.

How roles are assigned

A bookmarked paragraph becomes an H1...H6 (level = `bookmarkLevel`); any other paragraph is a P; the logo above is a Figure carrying its alt text. Rules, watermarks and the running header are Artifacts that assistive tech skips.

Accessible and archival at once

Combine `options.tagged` with the `pdfa` option (or render a Factur-X invoice) and the output declares BOTH PDF/UA-1 (accessible) and PDF/A-3b (archival) over one structure tree — a single file that is accessible, archival and, for invoices, machine-readable.
